

Welded Ornamental Steel Fence

VERSAI residential steel fence system provides the perfect combination of high quality steel, remarkable terrain adjusting ability and one of the highest quality coatings available today.

VERSAI residential fence is manufactured using pre-galvanized steel which creates an added layer of protective coating. All panels are factory assembled to minimize installation time and ensure structural integrity, and pre-punched mounting holes offer simple and cost effective bracket installation.

Engineered with a distinctive internal patent pending pin-hinge system, VERSAI easily adjusts to extreme changes in ground

elevations and can rack an astounding 48" in an 8' section. This feature, along with the innovative rail design, provides the added benefit of no visible fasteners from either side of the fence and rails that are perfectly smooth, unlike the unsightly wavy look of competing products.

Once assembled, the galvanized steel fence components are coated with *FortressShield*, a premium coating process which includes a corrosion resistant E-Coat followed by an architectural grade powder top coat. This process produces long lasting beauty and maintenance free enjoyment for years to come.

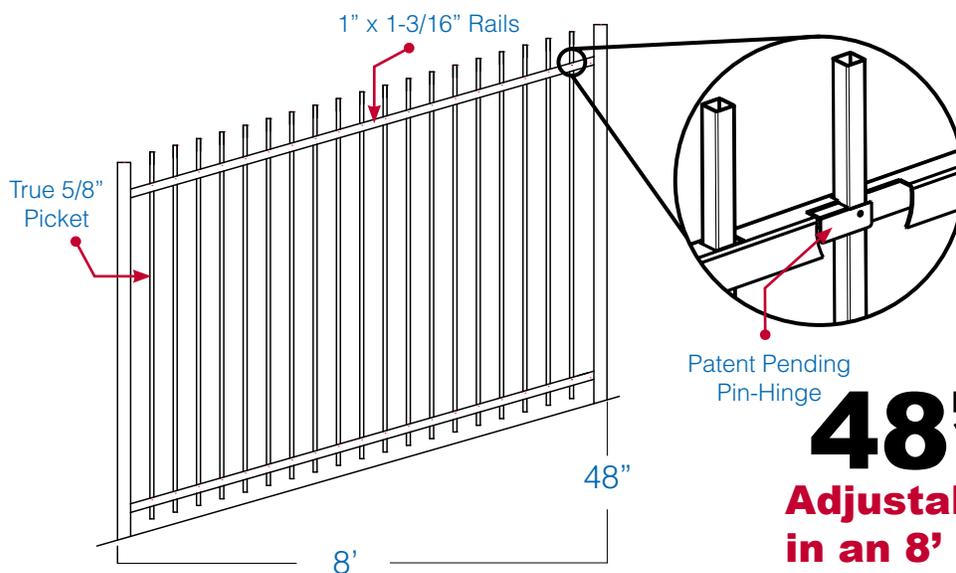

VERSAI FEATURES

- 48" of Adjustability in an 8' Section
- True 5/8" Square Picket
- E-Coat and Architectural Grade Powder Top Coat
- Rigid Welded Steel Construction
- No Visible Fasteners
- Virtually Maintenance Free
- 20 Year Limited Warranty

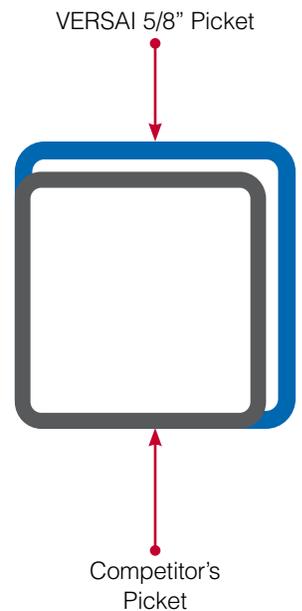

VERSAI Adjustability

VERSAI residential fence is designed with an internal patent pending pin-hinge system which enables the panels to easily accommodate aggressive changes in ground elevations. With 48" of adjustability in each 8' section, VERSAI provides the perfect solution to the changes in ground elevations often seen in residential areas, and eliminates the need for costly and time consuming stair stepping.

48" of
Adjustability
in an 8' Section

TRUE 5/8" SQUARE PICKET

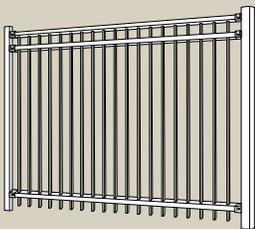

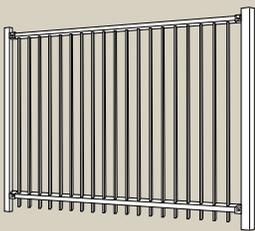

FLAT TOP

A clean design with no pickets above the top rail.

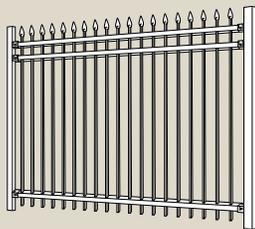

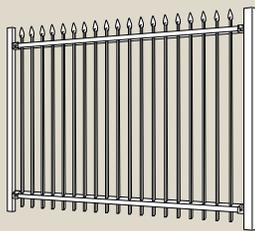

Available in 2 or 3 rail styles.

PRESSED SPEAR

A secure and elegant design with pressed spear pickets.

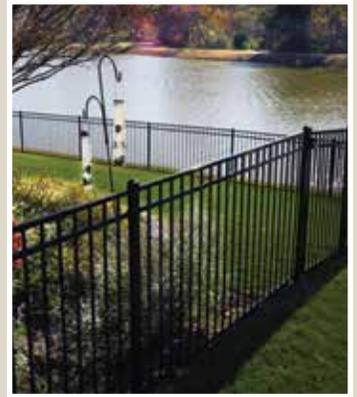

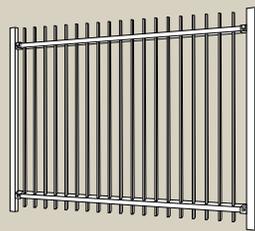

Available in 2 or 3 rail styles.

EXTENDED PICKET

A traditional design with square top pickets.

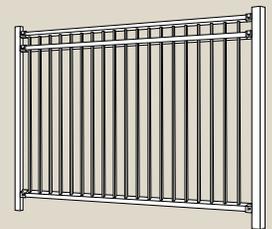

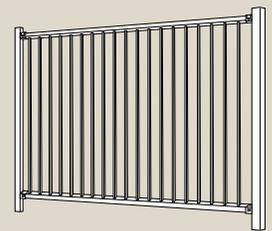

Available in 2 or 3 rail styles.

FLAT TOP / FLAT BOTTOM

A clean design with no pickets above the top or below the bottom rail.

Available in 2 or 3 rail styles.

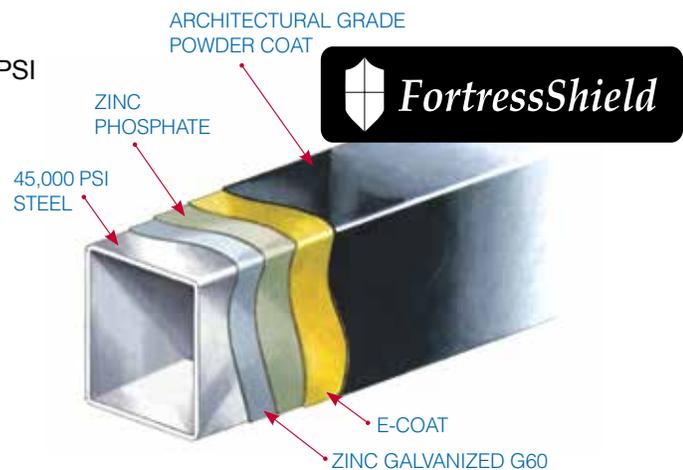

FortressShield Powder Coat Process

VERSAI pickets, posts and rails are produced with pre-galvanized 45,000 PSI steel and all components receive the *FortressShield* powder coat process.

Galvanized components are cleaned with a non-petroleum solvent, followed by the application of a sealing zinc phosphate coating.

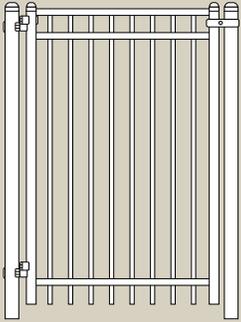

Immediately after sealing, components are first coated with a corrosion resistant E-Coat, followed by an architectural grade powder top coat.

This high-end *FortressShield* coating process ensures that each VERSAI residential fence system will provide years of worry free performance.

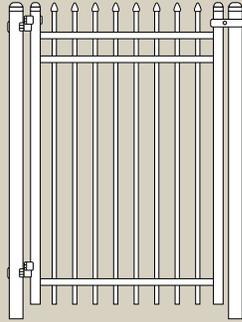

Gates

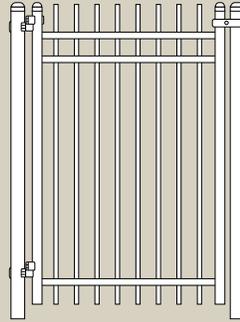

A large selection of gate sizes and styles are available to coordinate with your VERSAI fence system.
